

EPILOG HEALTH ANNOUNCES MAJOR, CYNGULAR® DISCOUNT PROGRAM FOR SAFETY NET HOSPITALS

CYNGULAR® – AI-BASED PATIENT ENGAGEMENT & RETENTION SOLUTION

Fairfax Station, VA Feb 11, 2025 — (<https://newswire.com>) — Epilog Health LLC announces a 30% discount program for Safety Net Hospitals, ensuring that healthcare facilities serving vulnerable communities can access advanced AI technology that improves patient engagement and retention.

Safety Net Hospitals play a critical role in providing essential healthcare to low-income, uninsured, and underserved populations. However, limited budgets often make it difficult for these hospitals to implement cutting-edge technologies that enhance patient care. Epilog Health is committed to bridging this gap by making Cyngular® more accessible through this new pricing initiative.

Launched last year, Cyngular® is an AI-powered patient engagement platform that goes beyond traditional EMR-based portals by offering continuous patient interaction, real-time population health data, and proactive patient retention strategies. The platform has already demonstrated success in boosting patient participation, expanding outreach to at-home populations, and improving overall healthcare outcomes.

The Safety Net Hospital Discount Program for Cyngular® is available immediately. Hospitals interested in learning more can contact Epilog Health at engage@epiloghealth.com for a preliminary proposal.

About Epilog:
