

PERFORMANCE DATA - CLIENT SITES – 90 to 120 DAYS AFTER GO-LIVE PERIOD

OVERALL | Ease of Use [High] Multi-Language Support [Great] Communication [Effective]

Right Solution | Cyngular®, the AI based solution addresses large population of at-home patients in conjunction with EMR Patient Portals. The solution features of Cyngular® are designed to effectively service large segment of at-home patients.

- Continuous patient engagement
- Ease of at-home patient access using Cyngular®
- Multi-language patient user interface
- Effective communication and exchange of patient vital data points
- Provider opportunities for more remote and virtual care
- Period reduction in readmission
- Increased goodwill building with patients
- Increase patient retention and collection of population health data

Effective implementation, wider-use solution, ease of use and continuous patient engagement are the core features that make Cyngular® highly effective. Cyngular® complements EMR Patient Portals by adding continuous patient engagement.
